AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended): A contents reproducing apparatus with telephone function, comprising:

a ~~reproducing means~~ reproducer for selectively reproducing a telephone voice signal and a first content signal,

a ~~generating means~~ generator for generating a second content signal,

a ~~disabling means~~ disabler for disabling said ~~generating means~~ generator when a reproducing signal by said ~~reproducing means~~ reproducer is said first content signal, and

an ~~activating means~~ activator for activating said ~~generating means~~ generator when a reproducing signal by said ~~reproducing means~~ reproducer is said telephone voice signal,

whereupon said on termination of said telephone voice signal ~~the content reproducing apparatus automatically reactivates said generating means without input by a user~~ said first content signal is automatically reproduced by said reproducer, and

wherein said reproducer includes a DSP for decoding said telephone voice signal and content signals.

U.S. Patent Application Serial No. **10/534,712**
Amendment filed August 29, 2009
Reply to OA dated May 22, 2008

Claim 2 (Currently Amended): A contents reproducing apparatus with telephone function according to claim 1, further comprising:

a first ~~output means~~ outputter for outputting said telephone voice signal, and
a second ~~output means~~ outputter for outputting any one of said first content signal and said second content signal.

Claim 3 (Currently Amended): A contents reproducing apparatus with telephone function according to claim 1 or claim 9, further comprising a ~~receiving means~~ receiver for receiving said telephone voice signal and said first content signal via a common communication line.

Claim 4 (Previously Presented): A contents reproducing apparatus with telephone function according to claim 1 or claim 9, wherein said second content signal belongs to the same genre as said first content signal.

Claim 5 (Previously Presented): A contents reproducing apparatus with telephone function according claim 1 or claim 9 being a fixed-type apparatus.

Claim 6 (Currently Amended): A contents reproducing apparatus with telephone function according to claim 2 or claim 9, further comprising a ~~receiving means~~ receiver for receiving said telephone voice signal and said first content signal via a common communication line.

Claim 7 (Previously Presented): A contents reproducing apparatus with telephone function according to claim 2 or claim 9, wherein said second content signal belongs to the same genre as said first content signal.

Claim 8 (Previously Presented): A contents reproducing apparatus with telephone function according to claim 2 or claim 9 being a fixed-type apparatus.

Claim 9 (Currently Amended): A contents reproducing apparatus with telephone function, comprising:

a ~~reproducing means~~ reproducer for selectively reproducing a telephone voice signal and a first content signal,

a ~~generating means~~ generator for generating a second content signal,

a ~~disabling means~~ disabler for disabling said ~~generating means~~ generator when a reproducing signal by said ~~reproducing means~~ reproducer is said first content signal, and

an ~~activating means~~ activator for activating said ~~generating means~~ generator when a reproducing signal by said ~~reproducing means~~ reproducer is said telephone voice signal,

a first ~~output means~~ outputter for outputting said telephone voice signal after reproducing by said reproducer, and

a second ~~output means~~ outputter for outputting ~~any one of said first content signal and said~~

~~second content signal~~ said first content signal after reproducing by said reproducer at a time that said telephone voice signal is not output by said first outputter, and said second content signal generated by said generator at a time that said telephone voice signal is output by said first outputter, wherein said reproducer includes a DSP for decoding said telephone voice signal and said first content signal.
